PROFESSIONAL SUMMARY

Full Stack Engineer specializing in building scalable, cloud-native applications with a focus on high-end frontend orchestration. Expert in bridging the gap between robust Python backends (FastAPI) and premium, interactive user interfaces. Proven track record of delivering industrial-grade portals and optimizing deployment pipelines via Docker and AWS.

SKILLS

- **Frontend:** React, Next.js, Astro.js, TypeScript, Tailwind CSS, GSAP, Scroll Trigger, Three.js (Basics).
- **Backend:** Python (FastAPI, Django), Node.js (Express.js), REST/GraphQL APIs, Prisma, Mongoose.
- **DevOps & Cloud:** Docker, AWS (EC2), CI/CD (GitHub Actions, Jenkins), Nginx, Redis, Kubernetes (KIND Cluster), Ingress-Nginx, HELM
- **Databases:** PostgreSQL (SQL), MongoDB, Cloudinary, Image Kit

PROFESSIONAL EXPERIENCE

Full Stack Developer | Ticketly.pk *(Dec 2025 – Present)*

- **Portal Architecture:** Managing and scaling the frontend ecosystem for multiple product portals, ensuring seamless state management and UI consistency. Architected the modular portal system in such a way that reduced component redundancy by 70% while maintaining 60fps animation performance
- **Full Stack Integration:** Coordinating between React-based frontends and Python backends to maintain high-performance benchmarks.

Frontend Developer | PakLawAssist *(Jan 2025 – Nov 2025)*

- **UI Orchestration:** Developed AI-powered legal service interfaces with a focus on responsive, accessible design.
- **Backend:** Actively contributed to Python-driven backend optimizations using FastAPI and worked on multiples portals
- **DevOps Exploration:** Explored deployment automation in Details. Implementing a successful Github Action and Jenkins pipeline (Jenkins Pipeline is being used at Company). Learnt and implemented Kubernetes in details

Freelance Frontend Developer *(2025)*

- **Project Delivery:** Successfully delivered 5 end-to-end frontend and backend solutions for international and local clients.

STRATEGIC PROJECTS

School Management System (Personal SaaS Full Stack Project) *Ongoing*

- **Architecture:** Building a multi-tenant system utilizing a PERN stack (moving toward Cloud-Native).
- **Deployment:** Will be Implementing Dockerized environments with planned Kubernetes orchestration and Jenkins-based CI/CD pipelines.

Library Management System (Full Stack) *on a Hold*

- **Architecture:** Building a College Library Management System utilizing a PERN stack (moving toward Cloud-Native) automating the traditions Library system in Government Colleges

AI Hedge Scratch:

- Developed an **AI-powered creative platform** (a freelanced Full Stack Fast Backend SaaS Project), an interactive node-based workflow system, enabling users to visually create and manage multiple workflow tabs within a single project for seamless task organization and dynamic process automation.

Premium UX Clones (Zentry & Brainwave)

- **Orchestration:** Engineered award-winning UI patterns focusing on staggered transitions and complex scroll-triggered motion logic.
- **Performance:** Optimized high-asset pages (GSAP/Scroll Trigger) to maintain fluid 60fps interactions on all devices.
